

Need temporary appliance bays during re-build or improvement projects?

Hire a temporary building from Aganto

Retain 100% operational capacity during build projects

Avoid the huge time and cost issues of decamping off-site

Keep projects running on time and within budget

Features

- 5m bays ideal for garages and appliance bays
- Specialist rapid rise doors with traffic light system
- Exhaust extraction
- Insulated environment for keeping clothing and equipment dry
- Can contain or be linked to portable cabin structures for offices, training and rest rooms
- Anchored down to existing hard standing – no foundations required
- Quick and simple to transport, install and dismantle
- Fully re-locatable
- Ancillary options include pedestrian and vehicle access doors, lighting, heating, flooring, power and windows
- Buildings can be gutter-linked to create larger structures
- Storage and workshop buildings also available

Technical Data

- Industrial Aluminium Frame in 5m modules with a 10 year guarantee
- Width 5m – 30m
- Length Unlimited in 5m modules
- Height 4.2m, 5.2m, 6.2m
- Snow and wind loadings to BS6399
- All roof, wall and floors conform to British Fire and Safety Codes

Working with Aganto using their technical knowledge and ability has allowed us to develop a blueprint for temporary fire stations which can be used for future PFI projects. Installing a temporary fire station on site as opposed to relocating, whilst being challenging, has saved time and expenditure and allowed the Service to retain the same level of emergency response.

Phil Smith, PFI Project Liaison Manager
Staffordshire Fire and Rescue Service

The temporary building provided met our budgetary needs perfectly and was installed and dismantled very quickly, with minimum disruption. During the whole process Aganto were exemplary in terms of professionalism, quality, care and attention; all of which played a key part in keeping the overall project on time and within budget.

Mark Tribble, Project Surveyor
Devon and Somerset Fire and Rescue Service

It was essential that the Stoke-On-Trent and Staffordshire Fire and Rescue Authority were able to continue operating at one hundred percent capacity during the rebuild of the Uttoxeter Fire Station and because of this our choice of temporary building provider was taken very carefully. We eventually choose Aganto because of their proven experience in fire station projects coupled with an exemplary level of experience and service.

Jeremy Hawkins, Assistant Project Manager
Stepnell

Aganto offers a wide portfolio of building ranges, details of which can be found on our website at www.aganto.co.uk or by calling us on **01635 202979**
