A smart solution for streamlined operations

Creating dedicated space for damage assessment at Hudson Kapel

Hudson Kapel is a leading name in the car auction industry, specialising in re-marketing nearly new, damaged, and salvaged vehicles. As their operations grew, additional space was required to assess damage to vehicles before being repaired and sold.

Solution:

Hudson Kapel first reached out to Aganto in 2023. Our area sales manager Andy Gilman visited their Norton, Worcester site to meet Jonathan and Julian, discussing their need for a dedicated space which they would use to assess damage to vehicles. Aganto was able to supply a bespoke solution tailored to Hudson Kapel's requirements.

The first structure, installed at Hudson Kapel's Worcester site, was a 15m x 20m insulated building with a 4.2m leg. Designed for damage assessment, this facility featured a rapid action door to allow easy movement of vehicles in and out. This helped streamline the evaluation process, enabling cars to be assessed repaired and listed much quicker.

Aganto delivered the structure on time and to spec, helping Hudson Kapel expand their operations. With a new dedicated spaces for damage assessment, they can now process vehicles more effectively, improving both turnaround times and auction presentation.

Features

- Insulated
- Pedestrian Access Doors
- Rapid Action Doors

Projects: Vehicle Repair Workshops
