Upgrade your sports facility with Aganto

Velocity Sports upgrade new sports facility with an Aganto building

Specialist sports pitch company Velocity Sports supplies artificial and natural pitches across the UK for the sports sector. Velocity Sports works closely with clients to deliver these products and services for their projects, including Ealing Trailfinders Rugby Club. As Principal Contractor for the Ealing Trailfinders Rugby Club sports project, Velocity Sports required a building to house a gymnasium. In the search for an efficient solution, they contacted Aganto for a temporary building.

Solution:

Aganto Area Sales Manager, Paul Watmore, visited Velocity Sports at Brunel University and conducted a site observation. After the size and the location of the temporary structure were identified, Velocity Sports proceeded with a 60-month hire of the gym.

Aganto supplied a 20m x 60m x 3.2m insulated temporary building, installed with solid gables and guttering, for secure weather protection. Three double pedestrian doors were fitted, along with multiple windows, with upgraded glass panels.

The investment in the temporary gymnasium has upgraded the new sports facility for Ealing Trailfinders Rugby Club. The size of the building has accommodated a 50-metre running track and individual weight and cardio stations, perfect for all gym goers.

Features

- Insulated
- Pedestrian Access Doors
- Windows
